SUMMARY OF SIX YEAR ROAD PLAN

| PRIORITY | PROJECT NUMBER | LOCATION & DESCRIPTION                                                                                                                                                  | COST    |
|----------|----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
|          | 1704           | Wells Rd.- This project consist of removing a wooden bridge structure and replacing with a 72" X 44' culvert                                                            | 20.0    |
|          | 1802           | Ridge Rd.- This project consist of replacing a structurally deficient bridge with a culvert and head walls. Hydraulic study needed to determine size.                   | 30.0    |
|          | 1909           | Hansen Hill Rd.- This project consist of replacing a structually deficient wooden bridge with a 72" x 36' culvert with wingwalls and headwalls. Hydraulic study needed. | unknown |
|          | 2312           | S Dickens Rd. - This project consists of drainage, stabilization and new gravel surface for 6 miles between W Bell Praire Rd. to W Ingham Rd.                           | 180.0   |
|          | 2316           | W State Farm Rd. - This project consists of drainage, stabilization and new gravel surface of 2 miles between S Hershey Dickens Rd. and S Range Rd.                     | 50.0    |
|          | 2414           | Sarben Rd. - This project consists of a mill and overlay of 4.8 miles beginning at Hwy. 30 and ending at the west county line.                                          | 715.0   |
|          | 2502           | Old Hwy 83. - This project consists of a mill and overlay of 1.0 miles beginning at E State Farm Rd. going south to the end of the asphalt.                             | 175.0   |
|          | 2503           | Banner Rd. South Channel Bridge - This project consists of the replacement of the existing structure.                                                                   | 3.2 mil |
|          | 2504           | W Walker Rd. - This project consists of drainage, stabilization and new gravel surface of 1.5 miles between Hwy 25 and S Seifer Rd.                                     | 40.0    |
|          | 2505           | W Antelope Rd. - This project consists of drainage, stabilization and new gravel surface of 1.5 miles between Wild Rose Rd. and S Game Trail Rd.                        | 40.0    |
|          | 2506           | N Game Trail Rd. - This project consists of replacing an existing bridge along an irrigation canal.                                                                     | unknown |

|      |                                                                                                                                                                                    |         |
|------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 2507 | S Range Rd. - This project consists of drainage, stabilization and new gravel surface of 1.0 miles between W State Farm Rd. and Power Rd.                                          | 25.0    |
| 2205 | Wildhorse Rd.- This project consists of a 2" mill and overlay for 2.1 miles from intersection of N. Brady to intersection of Svea-dal.                                             | 375.0   |
| 2508 | N Brady Rd. - This project consists of a 2" mill and overlay of 9.5 miles beginning at Wildhorse Rd. going north to the end of the asphalt.                                        | 1.5 mil |
| 2509 | E County Line Rd. - This project consists of a 2" mill and overlay of 1.4 miles beginning at Hwy. 30 going north to the end of Lincoln County maintenance.                         | 245.0   |
| 2510 | S Svea Dal Rd. - This project consists of a 2" mill and overlay of 1.5 miles beginning at Wild Horse Rd. going south to the end of the asphalt.                                    | 265.0   |
| 2512 | N Parkway Rd. - This project consists of replacing an existing bridge along an irrigation canal.                                                                                   | unknown |
| 2513 | N Willow Creek Rd. - This project consists of replacing an existing bridge along an irrigation canal.                                                                              | unknown |
| 2514 | Jandebeur 2nd Subdivision - This project consists of the overlay of 0.75 miles of asphalt within the limits of the subdivision.                                                    | 160.0   |
| 2515 | Lakeview Subdivision - This project consists of the overlay of 1.75 miles of asphalt within the limits of the subdivision.                                                         | 360.0   |
| 2516 | E Brown Rd. - This project consists of a 2" mill and overlay of 2.5 miles beginning at Hwy. 83 going east and south to the end of the asphalt at Branting Rd.                      | 440.0   |
| 2522 | N Brady Rd. - This project consists of drainage, stabilization and new gravel surface of 9.0 miles beginning at the north end of the asphalt and ending at Niedan Rd.              | 270.0   |
| 2523 | W Lone Star Rd. - This project consists of the design, engineering, earthwork, drainage, stabilization, erosion control, gravel and signage of 8.0 miles of new construction road. | unknown |

|  |      |                                                                                                                                                                                                                                                                                                                                                                                                |       |
|--|------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
|  | 2603 | S Brady Moorefield Rd. - This project consists of the Seal Coat and Resurfacing of 6.75 miles of S Brady Moorefield Rd. beginning at Banner Rd. and ending at the south end of the asphalt pavement.                                                                                                                                                                                           | 170.0 |
|  | 2604 | E Fort McPherson Rd. - This project consists of the Seal Coat and Resurfacing of 10.0 miles of E Fort McPherson Rd. beginning at Banner Rd. and ending at the end of County Maintenance at the cemetery south of Maxwell.                                                                                                                                                                      | 250.0 |
|  | 2605 | E State Farm Rd. - This project consists of the Seal Coat and Resurfacing of 14.0 miles of E State Farm Rd. beginning at the State 56A spur south of Maxwell and ending at the end of County Maintenance at the S Newberry Rd. south of North Platte.                                                                                                                                          | 350.0 |
|  | 2606 | W Walker Rd. - This project consists of the Seal Coat and Resurfacing of 16.2 miles of W Walker Rd. beginning at S Echo Dr. and ending at S Hershey Dickens Rd. as well as 2.0 miles on W State Farm Rd. beginning west of Hwy. 83 going west to the end of the asphalt pavement and 2.7 miles of S Buffalo Bill Avenue beginning at W State Farm Rd. going south and ending at North Lake Rd. | 405.0 |
